P32-A
Dark Blue

ABC 2 in 1 MOSAIC TILE ADHESIVE & GROUT is especially formulated for faster, easier & more efficient mosaic tile installations. It conveniently bonds and grouts all kinds of mosaic tiles.

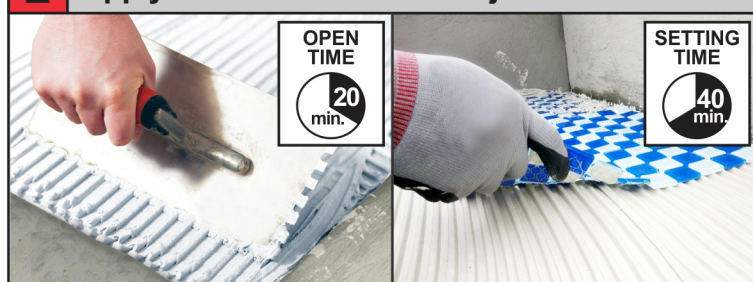

1 Mix with water in a plastic pail

Pour clean water into a container & add ABC 2 in 1 powder. Stir to attain a lump-free, creamy consistency. Use immediately after mixing and strictly observe 1 hour pot life.

⚠ Use a **level bar** to ensure levelness / plumbness of the surface.

2 Apply with a notched trowel just like adhesive

Dampen surface before application. Spread ABC 2 in 1 mortar with a notched trowel & position mosaic tiles immediately within 20 minutes open time. Press mosaic tiles with a rubber float to ensure good bonding & 100% mortar coverage. Use tile spacers for proper alignment & remember to carefully remove them before adhesive sets. Let tiles set for about 40 minutes. Do random checks to make sure all tile pieces are level & all tile sheets are properly adhered.

3 Spread with a rubber float just like tile grout

Start grouting with a rubber float by spreading 2 in 1 mortar diagonally across the tile joints making sure all joints are uniformly filled. Wait for 5 minutes & carefully remove excess mortar with a damp sponge using diagonal strokes. Remove haze with a clean, damp & lint-free cloth. Don't allow excess mortar to harden on tiles since it will be difficult to remove later on.
