 ORIGINAL +  REDIFIX	✓	✓	All tiles & sizes Tiling over: - existing tiles - wood - gypsum board - fiber cement board - metal - marble - granolithic flooring - glass	Non-Concrete Surface

Baumax Pro Tips

- For tile adhesive application thickness greater than 6mm (e.g. large format tiles & medium to thick bed), use the double spreading method (on the substrate and the back of the tile).
- If the back of a tile is too smooth, apply a Scratch Coat to roughen the surface for easier wall installations.
- Always comb mortar in straight manner lines to allow air release ensuring 100% mortar coverage.

COVERAGE of 25kg Tile Adhesive

Tile Size	Adhesive Thickness (minimum)	Coverage (approx.)
mosaic and smaller than 30 x 30cm	3mm	5m ²
60 x 60cm & smaller	6mm	2.6m ²
larger than 60 x 60cm	10mm	1.6m ²

NOTE: Coverage is dependent on tile size, surface smoothness of the back of the tile, substrate condition and adhesive application thickness. The bigger the tile, the smaller the coverage area.

Redifix Slurry

4L **REDIFIX** + 25kg **TILE ADHESIVE ORIGINAL**

Coverage* (approx)

8 - 9m²

Redifix Modified Tile Adhesive

4L **REDIFIX** + 4L water + 25kg **TILE ADHESIVE ORIGINAL**

Adhesive thickness	3mm	5m ²
	6mm	2.6m ²
	10mm	1.6m ²

*Note: Adhesive coverage is dependent on tile size, surface smoothness of the back of the tile, substrate condition and application thickness. The bigger the tile, the smaller the coverage area.
