Note: Calculation based on 5 pieces of 30 x 30cm mosaic tile sheets using a 6 x 6mm notched trowel.

SURFACE PREPARATION

The surface must be fully cured, structurally stable, level, even, clean and free from contaminants such as dirt, dust, loose material, oils and chemicals. **The use of a level bar is essential to ensure levelness and / or plumbness of the surface.** For painted surfaces, acid etch or abrade paint to ensure proper bonding.

APPLICATION GUIDE

Step 1 The ABC 2 in 1 System

Caution: Use only non-absorptive materials as mixing base (plastic pail or galvanized iron sheets). If absorbent materials such as plywood, wooden box, gypsum board, fiber cement board or cardboard is used, it will affect the chemical properties of the product, which can result in bonding failure & poor product performance.

Pot Life
1 hour

Pour clean water and add ABC 2 in 1 powder. Stir to attain a lump-free, creamy consistency. Use immediately after mixing.

Mixing Ratio

650ml **WATER** + **2kg** **ABC 2in1** Mosaic Tile Adhesive & Grout

Step 2 ■ Dampen surface before applying ABC 2 in 1.

■ Spread ABC 2 in 1 with the use of 6mm x 6mm notched trowel and position mosaic tiles immediately or within the OPEN TIME of 20 minutes.

■ Press on the mosaic tiles with the use of a rubber float to ensure good contact and coverage. Use tile spacers to ensure proper alignment and carefully remove before adhesive sets. Let the tiles set for around 40 minutes and check for tile movement by applying pressure to ensure a good bond.
